

TANISHQ JAISWAL

Gurugram, Haryana, India tanishqcoc24@gmail.com +91-8010035815,7042173039
linkedin.com/in/tanishq | github.com/devtanishq-tech | leetcode.com/tanishq | tanishq.dev

Summary

Software Developer with strong foundations in Java, JavaScript, and Data Structures & Algorithms. Experienced in building and deploying full-stack web applications using React.js, Node.js, and MongoDB. Passionate about designing scalable backend systems and solving real-world engineering problems.

Education

Dronacharya College of Engineering

B.Tech in Computer Science and Engineering (CSE)

Gurugram, Haryana, India

Expected: 2026

Coursework: DSA, OOP, Web Development, DBMS, Software Engineering, Operating Systems, Computer Networks

Technical Projects

Airbnb-Inspired Property Rental Platform || **Full-Stack Web Application** [\[GitHub\]](#) [\[Live\]](#) *Node.js, Express.js, MongoDB, Cloudinary, Mapbox*

- Engineered a production-ready full-stack rental marketplace with RESTful API architecture supporting property listing creation, advanced filtering, and seamless booking functionality.
- Implemented MVC architecture with session-based authentication and integrated Cloudinary for scalable image storage and Mapbox API for geolocation-driven property visualization.
- Deployed backend on Render with CI/CD pipeline, achieving 99.5% uptime and reduced cold-start latency by 35% through connection pooling and query optimization.

TradeFlow – Zerodha-Style Trading Platform (Custom Engine) [\[GitHub\]](#) [\[Live\]](#) *React.js, Node.js, Express.js, MongoDB, Socket.io, Material UI, Recharts, LLM Integration*

- Built a full-stack trading simulation platform with Zerodha-inspired UI, enabling virtual buy/sell execution, real-time portfolio tracking, and PL analytics with secure JWT-based authentication.
- Developed a custom mock stock engine (no external APIs) using WebSockets to simulate live market behavior, broadcasting price updates every 5 seconds to multiple clients for real-time dashboards.
- Integrated a Gemini 2.5 Flash-powered trading assistant enabling natural language interaction for real-time market insights and intelligent buy/sell decision support.

Zoom-Inspired Video Conferencing Platform [\[GitHub\]](#) *React.js, Node.js, WebRTC, Socket.io, MongoDB*

- Developed a scalable video conferencing app with peer-to-peer WebRTC streaming, real-time chat via Socket.io, and dynamic room lifecycle management supporting 10+ concurrent participants.
- Deployed frontend on Vercel and Node.js backend on Render; achieved sub-200ms connection setup latency and 99% uptime validated under simulated load testing.

LLM-Powered Conversational AI Platform [\[GitHub\]](#) [\[Live\]](#) *React.js, Node.js, Express.js, Groq API*

- Built an LLM-powered conversational AI platform with real-time streaming responses, context-aware interactions, voice-enabled AI features, and Groq API integration.
- Developed a secure and fully responsive full-stack application using JWT authentication, scalable Node.js/Express.js backend architecture, and production-ready cross-device user experience.

Technical Skills

- Languages:** Java, JavaScript, TypeScript, Python, C++, SQL
- Frontend:** HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap
- Backend:** Node.js, Express.js, MongoDB, FastAPI, Flask, Django
- DevOps & Tools:** Git, GitHub, Docker, Kubernetes, CI/CD, Postman, Netlify, Vercel, Render
- AI/ML:** Generative AI, Agentic AI, Prompt Engineering, Large Language Models (LLMs), OpenAI API

Achievements / Coding Profiles

- Solved **100+ DSA problems** on LeetCode with Java, covering arrays, linked lists, trees, graphs, and dynamic programming.
- GitHub:** github.com/devtanishq-tech **LeetCode:** leetcode.com/tanishq **Portfolio:** tanishq.dev

Leadership / Activities

- Actively contributed to peer code reviews and collaborative full-stack development sessions, mentoring peers on system design, REST API patterns, and deployment best practices.
