

TANISHQ JAISWAL

Gurugram, Haryana, India tanishqcoc24@gmail.com +91-7042173039
linkedin.com/in/tanishq | github.com/devtanishq-tech | leetcode.com/tanishq | tanishq.dev

Summary

Software Developer with strong foundations in Java, JavaScript, and Data Structures & Algorithms. Experienced in building and deploying full-stack web applications using React.js, Node.js, and MongoDB. Passionate about designing scalable backend systems and solving real-world engineering problems.

Education

Dronacharya College of Engineering Gurugram, Haryana, India
B.Tech in Computer Science and Engineering (CSE) Expected: 2026
Coursework: DSA, OOP, Web Development, DBMS, Software Engineering, Operating Systems, Computer Networks

Technical Projects

Airbnb-Inspired Property Rental Platform || **Full-Stack Web Application** [\[GitHub\]](#) [\[Live\]](#) *Node.js, Express.js, MongoDB, Cloudinary, Mapbox*

- Engineered a production-ready full-stack rental marketplace with RESTful API architecture supporting property listing creation, advanced filtering, and seamless booking functionality.
- Implemented MVC architecture with session-based authentication and integrated Cloudinary for scalable image storage and Mapbox API for geolocation-driven property visualization.
- Deployed backend on Render with CI/CD pipeline, achieving 99.5% uptime and reduced cold-start latency by 35% through connection pooling and query optimization.

TradeFlow – Zerodha-Inspired Real-Time Trading Platform [\[GitHub\]](#) [\[Live\]](#) *React.js, Node.js, Express.js, MongoDB, Socket.io, Tailwind CSS*

- Architected a full-stack stock trading simulation platform enabling virtual buy/sell execution, real-time portfolio tracking, and P&L analytics with secure JWT-based authentication.
- Implemented WebSocket-powered live market data streaming with Socket.io, broadcasting simulated NSE stock price updates every 2 seconds for real-time trading dashboards.
- Designed scalable REST APIs and optimized MongoDB schemas for holdings, transactions, and watchlists, ensuring low-latency data access under concurrent user activity.

Zoom-Inspired Video Conferencing Platform [\[GitHub\]](#) *React.js, Node.js, WebRTC, Socket.io, MongoDB*

- Developed a scalable video conferencing app with peer-to-peer WebRTC streaming, real-time chat via Socket.io, and dynamic room lifecycle management supporting 10+ concurrent participants.
- Deployed frontend on Vercel and Node.js backend on Render; achieved sub-200ms connection setup latency and 99% uptime validated under simulated load testing.

ChatGPT Clone – AI Conversational Web App [\[GitHub\]](#) *React.js, Node.js, Express.js, OpenAI API*

- Built a ChatGPT-like conversational web application by integrating the OpenAI LLM API for real-time AI-generated responses, handling prompt engineering and context management via REST API communication.
- Developed a responsive React.js chat interface with streaming response rendering and Node.js/Express.js backend middleware for secure API key handling and rate-limit management.

Technical Skills

- Languages:** Java, JavaScript, TypeScript, Python, C++, SQL
- Frontend:** HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap
- Backend:** Node.js, Express.js, MongoDB, FastAPI, Flask, Django
- DevOps & Tools:** Git, GitHub, Docker, Kubernetes, CI/CD, Postman, Netlify, Vercel, Render
- AI/ML:** Generative AI, Agentic AI, Prompt Engineering, Large Language Models (LLMs), OpenAI API

Achievements / Coding Profiles

- Solved **100+ DSA problems** on LeetCode with Java, covering arrays, linked lists, trees, graphs, and dynamic programming.
- GitHub:** github.com/devtanishq-tech **LeetCode:** leetcode.com/tanishq **Portfolio:** tanishq.dev

Leadership / Activities

- Actively contributed to peer code reviews and collaborative full-stack development sessions, mentoring peers on system design, REST API patterns, and deployment best practices.
