Summary

Software Developer and AI Engineer with experience building full-stack applications and agentic AI systems using TypeScript, Node.js, React, LangChain, LangGraph, RAG, and LLM APIs. Experienced in building tool-calling agents, real-time applications, REST APIs, and production-oriented backend systems.

Education

Dronacharya College of Engineering

B.Tech in Computer Science and Engineering (CSE)

Gurugram, Haryana, India

Expected: 2026

Coursework: DSA, OOP, Web Development, DBMS, Software Engineering, Operating Systems, Computer Networks

Technical Projects

AI SaaS Platform – Multi-Agent LLM Application [\[GitHub\]](#) [\[Live\]](#) *React.js, Node.js, Express.js, LangChain, LangGraph, Groq API, Vector Embeddings, RAG*

- Engineered a production-ready AI SaaS platform integrating LangGraph StateGraph, LangChain, and Groq LLMs to orchestrate multi-step agent workflows with streaming responses and persistent conversational memory.
- Built a complete Retrieval-Augmented Generation (RAG) pipeline using document ingestion, text chunking, embedding generation, semantic retrieval, and context-aware response synthesis for accurate knowledge retrieval.
- Implemented multiple AI agents with dynamic tool calling, graph-based execution, and backend API orchestration, enabling autonomous task execution across external services through structured workflows.

TradeFlow – Zerodha-Style Trading Platform (Custom Engine) [\[GitHub\]](#) [\[Live\]](#) *React.js, Node.js, Express.js, MongoDB, Socket.io, Material UI, Recharts, LLM Integration*

- Built a full-stack trading simulation platform with Zerodha-inspired UI, enabling virtual buy/sell execution, real-time portfolio tracking, and PL analytics with secure JWT-based authentication.
- Developed a custom mock stock engine (no external APIs) using WebSockets to simulate live market behavior, broadcasting price updates every 5 seconds to multiple clients for real-time dashboards.
- Integrated a Gemini 2.5 Flash-powered trading assistant enabling natural language interaction for real-time market insights and intelligent buy/sell decision support.

Airbnb-Inspired Property Rental Platform [\[Full-Stack Web Application\]](#) [\[GitHub\]](#) [\[Live\]](#) *Node.js, Express.js, MongoDB, Cloudinary, Mapbox*

- Engineered a production-ready full-stack rental marketplace with RESTful API architecture supporting property listing creation, advanced filtering, and seamless booking functionality.
- Implemented MVC architecture with session-based authentication and integrated Cloudinary for scalable image storage and Mapbox API for geolocation-driven property visualization.

Google Workspace AI Agent [\[GitHub\]](#) *Node.js, TypeScript, LangGraph, LangChain, Groq API, Google Calendar API, Gmail API, Google People API, Tavily*

- Built an Agentic AI assistant using LangGraph StateGraph that performs multi-step reasoning with conditional graph execution, persistent conversation memory, and dynamic tool calling.
- Integrated Google Calendar, Gmail, Google Contacts, and Tavily Search, enabling autonomous workflows such as scheduling meetings, composing/sending emails, retrieving inbox content, and contact resolution through natural language.

Technical Skills

- Languages:** Java, JavaScript, TypeScript, Python, C++, SQL
- Frontend:** HTML5, CSS3, React.js, Next.js, Tailwind CSS, Bootstrap
- Backend:** Node.js, Express.js, MongoDB, Langchain, Langgraph, Langsmith, FastAPI, Flask, Django, RAG Pipeline, Self-rag, CRAG
- DevOps & Tools:** Git, GitHub, Docker, Kubernetes, CI/CD, Postman, Netlify, Vercel, Render
- AI/ML:** Generative AI, Agentic AI, Prompt Engineering, Large Language Models (LLMs), OpenAI API

Achievements / Coding Profiles

- Solved **100+ DSA problems** on LeetCode with Java, covering arrays, linked lists, trees, graphs, and dynamic programming.
- GitHub:** github.com/devtanishq-tech **LeetCode:** leetcode.com/tanishq **Portfolio:** tanishq.dev

Leadership / Activities

- Actively contributed to peer code reviews and collaborative full-stack development sessions, mentoring peers on system design, REST API patterns, and deployment best practices.
